Approved for Aluminum Contact

Better Corrosion Protection

Environmentally Preferable Product

Warranty Programs

MicroShades<sup>TM</sup> Color Choices

## Builders, Contractors, & Homeowners Use MicroPro<sup>TM</sup> Pressure Treated Wood Products

# Top 10 Reasons Why

MicroPro (Micronized Copper Quaternary) treated wood provides builders, contractors, and homeowners with these treated wood product advantages:

- 1 Lighter "Natural" color.
- 2 More natural wood appearance.
- 3 First Wood Preservative to Receive EPP Status. The Osmose MicroPro technology is the first wood preservative to be EPP (Environmentally Preferable Product) certified by Scientific Certification Systems.
- 4 Because of its lighter color - Better paint and stainability.
- 5 Better corrosion protection for exterior code-approved fasteners and hardware.
- 6 MicroShades<sup>TM</sup> - Innovative micronized pigment color choices. Pressure treated wood colors similar to redwood & cedar.
- 7 End uses include interior and exterior above ground, ground contact, and fresh water immersion.
- 8 Treated wood warranty programs.\*\*
- 9 Approved for aluminum contact.\*
- 10 Building code compliant. ICC - ES Report, ESR-1980

MicroPro pressure treated wood products are treated with Micronized Copper Quaternary Compounds. Smart Sense / MicroPro treated wood products are produced by independently owned and operated wood treating facilities. MicroPro<sup>TM</sup> is a trademark of Osmose, Inc.
