

Glazing strip

- Body in solid EPDM rubber.
- Seal in EPDM cellular rubber - closed cells and continuous skin.
- Almost zero water absorption.
- Bevelled for water run-off
- Profile with base for secure fitting in groove.
- Glazing strip fitted with concealed nails flush with glazing panel. Rubber strips fitted on both sides of window to finish.
- No need to put pressure on glass to compress rubber profiles.
- Same profile used inside and outside.
